

## MMP100 | WEB DEVELOPMENT PROJECT STATEMENT

Title: Trip Disaster

Semester/Year: Fall 2021

Coding language/software: Sublime Text

My “choose your own adventure” is about a woman traveler visiting two countries which are Rio De Janeiro, Brazil and Quintana Roo, Mexico. I specifically chose these countries because I am both Brazilian and Mexican and wanted to incorporate them for this project. Instead of a good trip I wanted the woman to have a disaster trip where she goes through the worst ever when visiting these countries because I thought it would be quite interesting. The most challenging part of this project was styling my code by using CSS but eventually I understood it a bit more because I looked up videos and watched back the zoom sessions which made it easier for me.
